

The Inground **Vinyl Liner** pool repair experts!

2019 Fall Winterization & Closing Agreement

Plan A – \$415.00 (includes a shock treatment)

Includes backwashing the filter, removal of ladders and handrails (if removable), and re-installation of water bag or safety cover and cover pump. Winterization of filtration system up to and including: one pump, one filter, and one heater, one salt water chlorine generator or automatic chlorine dispenser, and one mineral dispenser. Also includes winterization of underground plumbing system. Hot tubs, swim outs, waterfalls, diving boards, and fountains may incur an additional charge. We do not remove or recommend removing diving boards. Clean off deck around pool using leaf blower.

Plan B – \$360.00 (includes a shock treatment)

Includes backwashing the filter, and removal of ladders and handrails (if removable). Winterization of filtration system up to and including: one pump, one filter, and one heater, one salt water chlorine generator or automatic chlorine dispenser, and one mineral dispenser. Also includes winterization of underground plumbing system. Hot tubs, swim outs, waterfalls, diving boards, and fountains may incur an additional charge. We do not remove or recommend removing diving boards. Clean off deck around pool using leaf blower.

Requirements and Conditions

1. Prior to our arrival the water level must be brought to 1" - 2" below the skimmer faceplate (this does not apply to those customers with an Aquador faceplate or Skimmer Plug).
2. All parts for the winterization should be left out by the pool. Any parts either missing, or that we feel will not work properly, will be replaced and billed accordingly. Please leave out any and all parts. (#10 plug - \$8, Ultra Gizmo - \$20, Aquador covers - \$30, Skimmer Plug - \$35, Water bags - \$13, are typical charges).
3. If antifreeze is required to properly winterize either the filtration or the plumbing systems it will be billed at \$13/gallon.
4. We recommend that the pool should be vacuumed and all chemicals are balanced 24 hours prior to closing. (This can help the opening go better with less chemical related problems in the spring). If APCO is pre-scheduled to vacuum the pool it will be for large debris and leaves only. We cannot vacuum algae.
5. If the pool has not been previously serviced and/or opened and closed by APCO, additional costs may be incurred depending upon; 1) the pump, filter, and pool layout, 2) the previous winterization methods, 3) the type of winterization parts.
6. We do not unwire or remove any equipment for inside storage (i.e. pumps, filters, diving boards, etc.). All equipment is designed to be out in the weather and more parts get damaged or broken while doing this.
7. Extra large pools (over 20' x40') hot tubs, waterfalls, & water features may require an additional charge (typically \$25 - \$100 each)
8. Due to insurance reasons, water bags must be used on the entire perimeter of the pool. If the customer supplies any other type of weight for APCO to install it is done so at the homeowners own risk.
9. Please indicate on reverse side any parts that are known to be missing or broken.
10. Any additional charges (for additional work incurred) will billed at \$65/hour with a \$35 minimum.)
11. **All leaking, filtration, and liner problems should be addressed and/or repaired prior to closing the pool.**
12. Any closing scheduled after the temperatures have gone below freezing may incur additional charges.
13. Pool water levels should always be monitored after closing and periodically during the winter.

See other side for schedule and payment.

**It's never too late to order a safety cover.
Call us today to start enjoying all the benefits they provide!**

Please indicate choice of plan type, options, and preferred week.
An APCO representative will contact you to confirm your appointment.
